AMERICAN CONCRETE INSTITUTE, Farmington Hills, Michigan

ACI Structural Journal VOLUME 103, 2006

Remove this section and include it with your January through December 2006 Volume 103 issues of the *ACI Structural Journal*.

A

Adsorption—Estimation of water retention curve from mercury intrusion porosimetry and van genuchten model (103-S31) Leech, C.; Lockington, D.; and Hooton, R. D., Mar.-Apr. 2006 291
Aggregate—Perforation resistance of high-strength concrete panels (103-S20) Bludau, C.; Keuser, M.; and Kustermann, A., Mar.-Apr. 2006 188
Aggregate interlock—Shear strength of reinforced concrete members subjected to monotonic loads (103-S10) von Ramin, M., and Matamoros, A. B., Jan.-Feb. 2006 83
Al Hammoud, R.—Evaluation of bond strength of bonded-in or post-installed reinforcement (103-S22) Mar.-Apr. 2006 207
Allowable tensile stress for webs of prestressed segmental concrete bridges (103-S51) Okeil, A. M., July-Aug. 2006 488
Altin, S.—Behavior of reinforced concrete frames with reinforced concrete partial infills (103-S72) Sept.-Oct. 2006 701
Aly, R.—Tensile lap splicing of fiber-reinforced polymer reinforcing bars in concrete (103-S87) Nov.-Dec. 2006 857
Analysis
—Modeling of unbonded post-tensioned concrete beams critical in shear (103-S07) Vecchio, F. J.; Gauvreau, P.; and Liu, K., Jan.-Feb. 2006 57
—Proposed shear design method for frp-reinforced concrete members without stirrups (103-S11) Razaqpur, A. G., and Isgor, O. B., Jan.-Feb. 2006 93
Analysis of reinforced concrete elements including shear effects (103-S66) Marini, A., and Spacone, E., Sept.-Oct. 2006 645
Analytical model for confined lightweight aggregate concrete (103-S28) Kim, Y.-J., and Harmon, T. G., Mar.-Apr. 2006 263
Analytical model for corrosion-induced crack width in reinforced concrete structures (103-S50) Li, C.-Q.; Melchers, R. E.; and Zheng, J.-J., July-Aug. 2006 479
Analytical model to predict nonlinear flexural behavior of corroded reinforced concrete beams (102-S56)
—El Maaddawy, T.; Soudki, K.; and Topper, T., July-Aug. 2005 550
—Disc. by Bischoff, P., May-June 2006 469
Anchorage
—Behavior and capacity of headed reinforcement (103-S55) Thompson, M. K.; Jirsa, J. O.; and Breen, J. E., July-Aug. 2006 522
—Behavior and design of adhesive bonded anchors (103-S83) Eligehausen, R.; Cook, R. A.; and Appl, J., Nov.-Dec. 2006 822
—CCT nodes anchored by headed bars—part 2: capacity of nodes (103-S08) Thompson, M. K.; Jirsa, J. O.; and Breen, J. E., Jan.-Feb. 2006 65
—Lap splices anchored by headed bars (103-S29) Thompson, M. K.; Ledesma, A.; Jirsa, J. O.; and Breen, J. E., Mar.-Apr. 2006 271
—Performance of shallow reinforced concrete beams with externally bonded steel-reinforced polymer (103-S17) Prota, A.; Tan, K. Y.; Nanni, A.; Pecce, M.; and Manfredi, G., Mar.-Apr. 2006 163
Anchors
—Behavior and design of adhesive bonded anchors (103-S83) Eligehausen, R.; Cook, R. A.; and Appl, J., Nov.-Dec. 2006 822
—Evaluation of bond strength of bonded-in or post-installed reinforcement (103-S22) Hamad, B. S.; Al Hammoud, R.; and Kunz, J., Mar.-Apr. 2006 207
Aparicio, A. C.—Shear behavior of unbonded post-tensioned segmental beams with dry joints (103-S43) May-June 2006 409
Appl, J.—Behavior and design of adhesive bonded anchors (103-S83) Nov.-Dec. 2006 822
Axial load behavior of self-consolidating concrete-filled steel tube columns in construction and service stages (103-S05) Lachemi, M.; Hossain, K. M. A.; and Lambros, V. B., Jan.-Feb. 2006 38
Axial strength—Axial load behavior of self-consolidating concrete-filled steel tube columns in construction and service stages (103-S05) Lachemi, M.; Hossain, K. M. A.; and Lambros, V. B., Jan.-Feb. 2006 38

B

Bakht, B.—Strength of reinforced concrete bridge decks under compressive membrane action (Disc. 102-S39) Mar.-Apr. 2006 306
Balkaya, C.—Finite element analysis and practical modeling of reinforced concrete multi-bin circular silos (103-S38) May-June 2006 365
Barnes, R. A.—Fiber-reinforced polymer strengthening of concrete bridges that remain open to traffic (Disc. 102-S83) Sept.-Oct. 2006 754
Barros, J. A. O.—Flexural behavior of reinforced masonry panels (103-S44) May-June 2006 418
Bars
—Bond strength of prefabricated epoxy-coated reinforcement (103-S24) De Anda, L.; Courtier, C.; and Moehle, J. P., Mar.-Apr. 2006 226
—CCT nodes anchored by headed bars—part 2: capacity of nodes (103-S08) Thompson, M. K.; Jirsa, J. O.; and Breen, J. E., Jan.-Feb. 2006 65
—Effect of reinforcing bar orientation and location on bond with self-consolidating concrete (103-S59) Castel, A.; Vidal, T.; Viriyametanont, K.; and François, R., July-Aug. 2006 559
—Evaluation of bond strength of bonded-in or post-installed reinforcement (103-S22) Hamad, B. S.; Al Hammoud, R.; and Kunz, J., Mar.-Apr. 2006 207
—Tensile lap splicing of fiber-reinforced polymer reinforcing bars in concrete (103-S87) Aly, R.; Benmokrane, B.; and Ebead, U., Nov.-Dec. 2006 857
Bayrak, O.
—Behavior and efficiency of bottle-shaped struts (103-S36) May-June 2006 348
—Design for shear based on loading conditions (103-S57) July-Aug. 2006 541
—Minimum transverse reinforcement for bottle-shaped struts (103-S82) Nov.-Dec. 2006 813
Bažant, Z. P.
—Repeating a classic set of experiments on size effect in shear of members without stirrups (Disc. 102-S84) Sept.-Oct. 2006 754
—Repeating a classic set of experiments on size effect in shear of members without stirrups (Disc. 102-S84) Sept.-Oct. 2006 755
Beam(s)
—Analysis of reinforced concrete elements including shear effects (103-S66) Marini, A., and Spacone, E., Sept.-Oct. 2006 645
—Compatibility torsion in spandrel beams using modified compression field theory (103-S34) Rahal, K. N., and Collins, M. P., May-June 2006 328
—Crack width in partially prestressed t-beams having steel fibers (103-S60) Thomas, J., and Ramaswamy, A., July-Aug. 2006 568
—Estimation of critical buckling moments in slender reinforced concrete beams (103-S32) Revathi, P., and Menon, D., Mar.-Apr. 2006 296
—Evaluation of aashto-lrfd general procedure for torsion and combined loading (103-S70) Rahal, K. N., Sept.-Oct. 2006 683
—Evaluation of strengthened reinforced concrete beams: cyclic load test and acoustic emission methods (103-S84) Nov.-Dec. 2006 832
—Modeling of shear behavior in reinforced concrete beams (103-S39) Coronelli, D., and Mulas, M. G., May-June 2006 372
—One-way shear strength of thick slabs and wide beams (103-S80) Sherwood, E. G.; Lubell, A. S.; Bentz, E. C.; and Collins, M. P., Nov.-Dec. 2006 794

—Proposed shear design method for frp-reinforced concrete members without stirrups (103-S11) Razaqpur, A. G., and Isgor, O. B., Jan.-Feb. 2006 93
—Shear behavior of reinforced concrete beams with variable thickness of concrete side cover (103-S18) Rahal, K.N., Mar.-Apr. 2006 171
—Shear capacity of high-strength concrete beams reinforced with frp bars (103-S40) El-Sayed, A. K.; El-Salakawy, E. F.; and Benmokrane, B., May-June 2006 383
—Shear strength of frp-reinforced concrete beams without transverse reinforcement (103-S25) El-Sayed, A. K.; El-Salakawy, E. F.; and Benmokrane, B., Mar.-Apr. 2006 235
—Shear strength of reinforced concrete t-beams (103-S71) Zararis, I. P.; Karaveziroglou, M. K.; and Zararis, P. D., Sept.-Oct. 2006 693
—Shear strength of reinforced concrete t-beams without transverse reinforcement (103-S67) Tureyen, A. K.; Wolf, T. S.; and Frosch, R. J., Sept.-Oct. 2006 656
—Strain-based shear strength model for slender beams without web reinforcement (103-S79) Park, H.-G.; Choi, K.-K.; and Wight, J. K., Nov.-Dec. 2006 783
—Strength of struts in deep concrete members designed using strut-and-tie method (103-S61) Quintero-Febres, C. G.; Parra-Montesinos, G.; and Wight, J. K., July-Aug. 2006 577
—Tensile lap splicing of fiber-reinforced polymer reinforcing bars in concrete (103-S87) Aly, R.; Benmokrane, B.; and Ebead, U., Nov.-Dec. 2006 857
—Unified span-to-depth ratio equation for nonprestressed concrete beams and slabs (103-S16) Scanlon, A., and Lee, Y. H., Jan.-Feb. 2006 142
—Use of cfrp/cfcc reinforcement in prestressed concrete box-beam bridges (103-S14) Grace, N. F.; Enomoto, T.; Sachidanandan, S.; and Puravankara, S., Jan.-Feb. 2006 123
Beam-column joints—Bond performance of interior beam-column joints with high-strength reinforcement (103-S63) Brooke, N. J.; Megget, L. M.; and Ingham, J. M., July-Aug. 2006 596
Bechtoula, H.—Cyclic performance of lower stories of mid-rise reinforced concrete frame buildings (103-S54) July-Aug. 2006 513
Behavior and capacity of headed reinforcement (103-S55) Thompson, M. K.; Jirsa, J. O.; and Breen, J. E., July-Aug. 2006 522
Behavior and design of adhesive bonded anchors (103-S83) Eligehausen, R.; Cook, R. A.; and Appl, J., Nov.-Dec. 2006 822
Behavior and ductility of reinforced concrete short columns using global truss model (103-S33) Moretti, M. L., and Tassios, T. P., May-June 2006 319
Behavior and efficiency of bottle-shaped struts (103-S36) Brown, M. D.; Sankovich, C. L.; Bayrak, O.; and Jirsa, J. O., May-June 2006 348
Behavior of hollow, rectangular reinforced concrete piers subjected to biaxial loading (103-S41) Santa Maria, H.; Wood, S. L.; and Breen, J. E., May-June 2006 390
Behavior of reinforced concrete frames with reinforced concrete partial infills (103-S72) Kara, M. E., and Altin, S., Sept.-Oct. 2006 701
Behavior of reinforced concrete members prone to shear deformations: part I—effect of confinement (103-S76) Powanusorn, S., and Bracci, J. M., Sept.-Oct. 2006 736
Behavior of reinforced concrete members prone to shear deformations: part II—effect of interfacial bond stress-slip (103-S77) Powanusorn, S., and Bracci, J. M., Sept.-Oct. 2006 747
Behavior of reinforced concrete t-beams strengthened in shear with carbon fiber-reinforced polymer—an experimental study (103-S35) Bousselham, A., and Chaallal, O., May-June 2006 339
Bending
—Behavior of hollow, rectangular reinforced concrete piers subjected to biaxial loading (103-S41) Santa Maria, H.; Wood, S. L.; and Breen, J. E., May-June 2006 390
—Evaluation of aashto-lrfd general procedure for torsion and combined loading (103-S70) Rahal, K. N., Sept.-Oct. 2006 683
Bending moment—Finite element analysis and practical modeling of reinforced concrete multi-bin circular silos (103-S38) Balkaya, C.; Kalkan, E.; and Yuksel, S. B., May-June 2006 365
Benmokrane, B.
—Shear capacity of high-strength concrete beams reinforced with frp bars (103-S40) May-June 2006 383
—Shear strength of frp-reinforced concrete beams without transverse reinforcement (103-S25) Mar.-Apr. 2006 235
—Tensile lap splicing of fiber-reinforced polymer reinforcing bars in concrete (103-S87) Nov.-Dec. 2006 857
Bent caps—Behavior of reinforced concrete members prone to shear deformations: part I—effect of confinement (103-S76) Sept.-Oct. 2006 736
Bentz, E. C.
—One-way shear strength of thick slabs and wide beams (103-S80) Nov.-Dec. 2006 794
—Simplified modified compression field theory for calculating shear strength of reinforced concrete elements (103-S65) July-Aug. 2006 614
Bischoff, P. H.—Analytical model to predict nonlinear flexural behavior of corroded reinforced concrete beams (Disc. 102-S56) May-June 2006 469
Bludau, C.—Perforation resistance of high-strength concrete panels (103-S20) Mar.-Apr. 2006 188
Bobet, A.—Evaluation of soil-structure interaction and structural collapse in daikai subway station during kobe earthquake (103-S13) Jan.-Feb. 2006 113
Bonaldo, E.—Flexural behavior of reinforced masonry panels (103-S44) May-June 2006 418
Bond
—Bond characteristics of high-strength steel reinforcement (103-S78) El-Hacha, R.; El-Agroudy, H.; and Rizkalla, S. H., Nov.-Dec. 2006 771
—Bond performance of interior beam-column joints with high-strength reinforcement (103-S63) Brooke, N. J.; Megget, L. M.; and Ingham, J. M., July-Aug. 2006 596
—Bond strength of prefabricated epoxy-coated reinforcement (103-S24) De Anda, L.; Courtier, C.; and Moehle, J. P., Mar.-Apr. 2006 226
—Design of lap-spliced bars: is simplification possible? (103-S47) Canbay, E., and Frosch, R. J., May-June 2006 444
—Development length of glass fiber-reinforced polymer bars in concrete (103-S02) Wambeke, B. W., and Shield, C. K., Jan.-Feb. 2006 11
—Effect of confinement on bond strength of hot-dip galvanized lap splices in high-strength concrete (103-S06) Hamad, B. S., and Fakhran, M. F., Jan.-Feb. 2006 48
—Evaluation of bond strength of bonded-in or post-installed reinforcement (103-S22) Hamad, B. S.; Al Hammoud, R.; and Kunz, J., Mar.-Apr. 2006 207
—Tensile lap splicing of fiber-reinforced polymer reinforcing bars in concrete (103-S87) Aly, R.; Benmokrane, B.; and Ebead, U., Nov.-Dec. 2006 857
Bond characteristics of high-strength steel reinforcement (103-S78) El-Hacha, R.; El-Agroudy, H.; and Rizkalla, S. Nov.-Dec. 2006 771
Bond performance of interior beam-column joints with high-strength reinforcement (103-S63) Brooke, N. J.; Megget, L. M.; and Ingham, J. M., July-Aug. 2006 596
Bond strength—Effect of confinement on bond strength of hot-dip galvanized lap splices in high-strength concrete (103-S06) Hamad, B. S., and Fakhran, M. F., Jan.-Feb. 2006 48
Bond strength of prefabricated epoxy-coated reinforcement (103-S24) De Anda, L.; Courtier, C.; and Moehle, J. P., Mar.-Apr. 2006 226
Bousselham, A.—Behavior of reinforced concrete t-beams strengthened in shear with carbon fiber-reinforced polymer—an experimental study (103-S35) May-June 2006 339
Bracci, J. M.
—Behavior of reinforced concrete members prone to shear deformations: part I—effect of confinement (103-S76) Sept.-Oct. 2006 736
—Behavior of reinforced concrete members prone to shear deformations: part II—effect of interfacial bond stress-slip (103-S77) Sept.-Oct. 2006 747
Bracket—Reinforced concrete corbels—shear strength model and design formula (103-S01) Russo, G.; Venir, R.; Pauletta, M.; and Somma, G., Jan.-Feb. 2006 3
Breen, J. E.
—Behavior and capacity of headed reinforcement (103-S55) July-Aug. 2006 522
—Behavior of hollow, rectangular reinforced concrete piers subjected to biaxial loading (103-S41) May-June 2006 390

—CCT nodes anchored by headed bars—part 2: capacity of nodes (103-S08) Jan.-Feb. 2006 65
—Headed studs in concrete: state of the art (Disc. 102-S67) July-Aug. 2006 627
—Lap splices anchored by headed bars (103-S29) Mar.-Apr. 2006 . . . 271
Bridges
—Allowable tensile stress for webs of prestressed segmental concrete bridges (103-S51) Okeil, A. M., July-Aug. 2006 488
—Seismic testing of bridge columns incorporating high-performance materials (103-S52) Restrepo, J. I.; Seible, F.; Stephan, B.; and Schoettler, M. J., July-Aug. 2006 496
—Shear behavior of unbonded post-tensioned segmental beams with dry joints (103-S43) Turmo, J.; Ramos, G.; and Aparicio, A. C., May-June 2006 409
—Use of cfrp/cfcc reinforcement in prestressed concrete box-beam bridges (103-S14) Grace, N. F.; Enomoto, T.; Sachidanandan, S.; and Puravankara, S., Jan.-Feb. 2006 123
Brooke, N. J.—Bond performance of interior beam-column joints with high-strength reinforcement (103-S63) July-Aug. 2006 596
Broujerdian, V.—Repeating a classic set of experiments on size effect in shear of members without stirrups (Disc. 102-S84) Sept.-Oct. 2006 757
Brown, M. D.
—Behavior and efficiency of bottle-shaped struts (103-S36) May-June 2006 348
—Design for shear based on loading conditions (103-S57) July-Aug. 2006 541
—Minimum transverse reinforcement for bottle-shaped struts (103-S82) Nov.-Dec. 2006 813
Buckling
—Behavior of hollow, rectangular reinforced concrete piers subjected to biaxial loading (103-S41) Santa Maria, H.; Wood, S. L.; and Breen, J. E., May-June 2006 390
—Cyclic performance of lower stories of mid-rise reinforced concrete frame buildings (103-S54) Bechtoula, H.; Sakashita, M.; Kono, S.; Watanabe, F.; and Eberhard, M. O., July-Aug. 2006 513
—Estimation of critical buckling moments in slender reinforced concrete beams (103-S32) Revathi, P., and Menon, D., Mar.-Apr. 2006 296
Building codes—Shear behavior of reinforced concrete beams with variable thickness of concrete side cover (103-S18) Rahal, K.N., Mar.-Apr. 2006 171
Burdet, O. L.—Effect of duct type on shear strength of thin webs (103-S75) Sept.-Oct. 2006 729

C

Canbay, E.—Design of lap-spliced bars: is simplification possible? (103-S47) May-June 2006 444
Carbon—Use of cfrp/cfcc reinforcement in prestressed concrete box-beam bridges (103-S14) Grace, N. F.; Enomoto, T.; Sachidanandan, S.; and Puravankara, S., Jan.-Feb. 2006 123
Castel, A.—Effect of reinforcing bar orientation and location on bond with self-consolidating concrete (103-S59) July-Aug. 2006. 559
Cast-in-place—Flexural behavior of precast joints with horizontal loop connections (103-S68) Ong, K. C. G.; Hao, J. B.; and Paramasivam, P., Sept.-Oct. 2006 664
CCT nodes anchored by headed bars—part 2: capacity of nodes (103-S08) Thompson, M. K.; Jirsa, J. O.; and Breen, J. E., Jan.-Feb. 2006 65
Chaallal, O.—Behavior of reinforced concrete t-beams strengthened in shear with carbon fiber-reinforced polymer—an experimental study (103-S35) May-June 2006 339
Chao, S.-H.—Simplified calculation of short-term deflection in prestressed two-way flat slabs (103-S86) Nov.-Dec. 2006 850
Chen, S.—Repair of bridge girders with composites: experimental and analytical validation (Disc. 102-S65) July-Aug. 2006 625
Cho, J.-Y.—Inelastic analysis of reinforced concrete columns with short lap splices subjected to reversed cyclic loads (103-S30) Mar.-Apr. 2006 280
Choi, K.-K.—Strain-based shear strength model for slender beams without web reinforcement (103-S79) Nov.-Dec. 2006 783
Choo, C. C.
—Minimum reinforcement ratio for fiber-reinforced polymer reinforced concrete rectangular columns (103-S49) May-June 2006. 460
—Strength of rectangular concrete columns reinforced with fiber-reinforced polymer bars (103-S48) May-June 2006 452
Clay—Flexural behavior of reinforced masonry panels (103-S44) Barros, J. A. O.; Oliveira, J. T.; Bonaldo, E.; and Lourenço, P. B., May-June 2006. 418
Collins, M. P.
—Compatibility torsion in spandrel beams using modified compression field theory (103-S34) May-June 2006 328
—One-way shear strength of thick slabs and wide beams (103-S80) Nov.-Dec. 2006 794
—Simplified modified compression field theory for calculating shear strength of reinforced concrete elements (103-S65) July-Aug. 2006. 614
Column(s)
—Axial load behavior of self-consolidating concrete-filled steel tube columns in construction and service stages (103-S05) Lachemi, M.; Hossain, K. M. A.; and Lambros, V. B., Jan.-Feb. 2006 38
—Behavior and ductility of reinforced concrete short columns using global truss method (103-S33) Moretti, M. L., and Tassios, T. P., May-June 2006. 319
—Evaluation of soil-structure interaction and structural collapse in daikai subway station during kobe earthquake (103-S13) Parra-Montesinos, G. J.; Bobet, A.; and Ramirez, J. A., Jan.-Feb. 2006 113
—Exploratory study of seismic response of concrete columns with shape memory alloys reinforcement (103-S46) Saiidi, M. S., and Wang, H., May-June 2006. 436
—Fiber-reinforced polymer jacketed and shape-modified compression members: I—experimental behavior (103-S90) Yan, Z.; Pantelides, C. P.; and Reaveley, L. D., Nov.-Dec. 2006 885
—Fiber-reinforced polymer jacketed and shape-modified compression members: II—model (103-S91) Yan, Z.; and Pantelides, C. P., Nov.-Dec. 2006. 894
—Full-scale cyclic lateral load test of reinforced concrete pier-column (103-S19) Janoyan, K. D.; Wallace, J. W.; and Stewart, J. P., Mar.-Apr. 2006. 178
—Inelastic analysis of reinforced concrete columns with short lap splices subjected to reversed cyclic loads (103-S30) Cho, J. Y., and Pincheira, J. A., Mar.-Apr. 2006 280
—Minimum reinforcement ratio for fiber-reinforced polymer reinforced concrete rectangular columns (103-S49) Choo, C. C.; Harik, I. E.; and Gesund, H., May-June 2006 460
—Punching of reinforced and post-tensioned concrete slab-column connections (103-S56) Kang, T. H.-K., and Wallace, J. W., July-Aug. 2006. 531
—Seismic retrofit of lap splices in nonductile square columns using carbon fiber-reinforced jackets (103-S89) Harries, K. A.; Ricles, J. R.; Pessiki, S.; and Sause, R., Nov.-Dec. 2006 874
—Strength of rectangular concrete columns reinforced with fiber-reinforced polymer bars (103-S48) Choo, C. C.; Harik, I. E.; and Gesund, H., May-June 2006. 452
—Stress-strain model for fiber-reinforced polymer jacketed concrete columns (103-S69) Harajli, M. H.; Hantouche, E.; and Soudki, K., Sept.-Oct. 2006. 672
Compatibility torsion in spandrel beams using modified compression field theory (103-S34) Rahal, K. N., and Collins, M. P., May-June 2006 328
Composite—Analytical model for confined lightweight aggregate concrete aggregate concrete (103-S28) Kim, Y.-J., and Harmon, T. G., Mar.-Apr. 2006. 263
Compression field modeling of fiber-reinforced concrete members under shear loading (103-S26) Minelli, F., and Vecchio, F. J., Mar.-Apr. 2006. 244
Confined concrete
—Behavior of reinforced concrete members prone to shear deformations: part I—effect of confinement (103-S76) Pawanusorn, S., and Bracci, J. M., Sept.-Oct. 2006 736
—Stress-strain model for fiber-reinforced polymer jacketed concrete

columns (103-S69) Harajli, M. H.; Hantouche, E.; and Soudki, K., Sept.-Oct. 2006 672
Confinement
—Analytical model for confined lightweight aggregate concrete aggregate concrete (103-S28) Kim, Y.-J., and Harmon, T. G., Mar.-Apr. 2006 263
—Axial load behavior of self-consolidating concrete-filled steel tube columns in construction and service stages (103-S05) Lachemi, M.; Hossain, K. M. A.; and Lambros, V. B., Jan.-Feb. 2006 38
—Bond characteristics of high-strength steel reinforcement (103-S78) El-Hacha, R.; El-Agroudy, H.; and Rizkalla, S. H., Nov.-Dec. 2006 771
—Concrete confinement with textile-reinforced mortar jackets (103-S04) Triantafillou, T. C.; Papanicolaou, C. G.; Zissimopoulos, P.; and Laourdekis, T., Jan.-Feb. 2006 28
—Fiber-reinforced polymer jacketed and shape-modified compression members: I—experimental behavior (103-S90) Yan, Z.; Pantelides, C. P.; and Reaveley, L. D., Nov.-Dec. 2006 885
—Fiber-reinforced polymer jacketed and shape-modified compression members: II—model (103-S91) Yan, Z.; and Pantelides, C. P., Nov.-Dec. 2006 894
Constitutive model—Analytical model for confined lightweight aggregate concrete aggregate concrete (103-S28) Kim, Y.-J., and Harmon, T. G., Mar.-Apr. 2006 263
Concrete
—Behavior of reinforced concrete members prone to shear deformations: part II—effect of interfacial bond stress-slip (103-S77) Powanusorn, S., and Bracci, J. M., Sept.-Oct. 2006 747
—Unified span-to-depth ratio equation for nonprestressed concrete beams and slabs (103-S16) Scanlon, A., and Lee, Y. H., Jan.-Feb. 2006 142
Concrete confinement with textile-reinforced mortar jackets (103-S04) Triantafillou, T. C.; Papanicolaou, C. G.; Zissimopoulos, P.; and Laourdekis, T., Jan.-Feb. 2006 28
Concrete masonry—Shaketable testing of rectangular post-tensioned concrete masonry walls (103-S62) Wight, G. D.; Ingham, J. M.; and Kowalsky, M. J., July-Aug. 2006 587
Cook, R. A.—Behavior and design of adhesive bonded anchors (103-S83) Nov.-Dec. 2006 822
Corbel—Reinforced concrete corbels—shear strength model and design formula (103-S01) Russo, G.; Venir, R.; Pauletta, M.; and Somma, G., Jan.-Feb. 2006 3
Coronelli, D.—Modeling of shear behavior in reinforced concrete beams (103-S39) May-June 2006 372
Corrosion
—Analytical model for corrosion-induced crack width in reinforced concrete structures (103-S50) Li, C.-Q.; Melchers, R. E.; and Zheng, J.-J., July-Aug. 2006 479
—Long-term monitoring of carbon fiber-reinforced polymer-wrapped reinforced concrete columns under severe environment (103-S88) Debaiky, A. S.; Green, M. F.; and Hope, B. B., Nov.-Dec. 2006 865
—Sampling techniques for evaluating large concrete structures: part II (103-S53) Williams, T. J.; Nozick, L. K.; Sansalone, M. J.; Poston, R. W.; and Kesner, K., July-Aug. 2006 505
—Tests of reinforced concrete beams with corrosion-damaged stirrups (103-S15) Higgins, C., and Farrow III, W. C., Jan.-Feb. 2006 133
Courtier, C.—Bond strength of prefabricated epoxy-coated reinforcement (103-S24) Mar.-Apr. 2006 226
Cover—Shear behavior of reinforced concrete beams with variable thickness of concrete side cover (103-S18) Rahal, K. N., Mar.-Apr. 2006 171
Crack—Cyclic performance of lower stories of mid-rise reinforced concrete frame buildings (103-S54) Bechtoula, H.; Sakashita, M.; Kono, S.; Watanabe, F.; and Eberhard, M. O., July-Aug. 2006 513
Cracking
—Analytical model for corrosion-induced crack width in reinforced concrete structures (103-S50) Li, C.-Q.; Melchers, R. E.; and Zheng, J.-J., July-Aug. 2006 479
—Behavior and ductility of reinforced concrete short columns using global truss method (103-S33) Moretti, M. L., and Tassios, T. P., May-June 2006 319
—Compatibility torsion in spandrel beams using modified compression field theory (103-S34) Rahal, K. N., and Collins, M. P., May-June 2006 328
—Compression field modeling of fiber-reinforced concrete members under shear loading (103-S26) Minelli, F., and Vecchio, F. J., Mar.-Apr. 2006 244
—Modeling of shear behavior in reinforced concrete beams (103-S39) Coronelli, D., and Mulas, M. G., May-June 2006 372
—Shear behavior of reinforced concrete beams with variable thickness of concrete side cover (103-S18) Rahal, K.N., Mar.-Apr. 2006 171
—Strength of struts in deep concrete members designed using strut-and-tie method (103-S61) Quintero-Febres, C. G.; Parra-Montesinos, G.; and Wight, J. K., July-Aug. 2006 577
Crack width in partially prestressed t-beams having steel fibers (103-S60) Thomas, J.; and Ramaswamy, A., July-Aug. 2006 568
Cyclic lateral loading of nonductile slab-column connections (103-S37) Robertson, I., and Johnson, G., May-June 2006 356
Cyclic load—Displacement history effects on drift capacity of reinforced concrete columns (103-S27) Pujol, S.; Sozen, M. A.; and Ramirez, J. A., Mar.-Apr. 2006 253
Cyclic performance of lower stories of mid-rise reinforced concrete frame buildings (103-S54) Bechtoula, H.; Sakashita, M.; Kono, S.; Watanabe, F.; and Eberhard, M. O., July-Aug. 2006 513

D

Damage
—Cyclic performance of lower stories of mid-rise reinforced concrete frame buildings (103-S54) Bechtoula, H.; Sakashita, M.; Kono, S.; Watanabe, F.; and Eberhard, M. O., July-Aug. 2006 513
—Tests of reinforced concrete beams with corrosion-damaged stirrups (103-S15) Higgins, C., and Farrow III, W. C., Jan.-Feb. 2006 133
Dazio, A.—Structural testing of new east bay skyway piers (103-S12) Jan.-Feb. 2006 103
De Anda, L.—Bond strength of prefabricated epoxy-coated reinforcement (103-S24) Mar.-Apr. 2006 226
Debaiky, A. S.—Long-term monitoring of carbon fiber-reinforced polymer-wrapped reinforced concrete columns under severe environment (103-S88) Nov.-Dec. 2006 865
Deflection
—Simplified calculation of short-term deflection in prestressed two-way flat slabs (103-S86) Chao, S.-H.; and Naaman, A. E., Nov.-Dec. 2006 850
—Unified span-to-depth ratio equation for nonprestressed concrete beams and slabs (103-S16) Scanlon, A., and Lee, Y. H., Jan.-Feb. 2006 142
Deformation
—Exploratory study of seismic response of concrete columns with shape memory alloys reinforcement (103-S46) Saiidi, M. S., and Wang, H., May-June 2006 436
—Strain-based shear strength model for slender beams without web reinforcement (103-S79) Park, H.-G.; Choi, K.-K.; and Wight, J. K., Nov.-Dec. 2006 783
Deformed reinforcement—Design of lap-spliced bars: is simplification possible? (103-S47) Canbay, E., and Frosch, R. J., May-June 2006 444
Design
—Modeling of unbonded post-tensioned concrete beams critical in shear (103S-07) Vecchio, F. J.; Gauvreau, P.; and Liu, K., Jan.-Feb. 2006 57
—Proposed shear design method for frp-reinforced concrete members without stirrups (103-S11) Razaqpur, A. G., and Isgor, O. B., Jan.-Feb. 2006 93
Design for shear based on loading conditions (103-S57) Brown, M. D.; Bayrak, O.; and Jirsa, J. O., July-Aug. 2006 541
Design of lap-spliced bars: is simplification possible? (103-S47) Canbay, E., and Frosch, R. J., May-June 2006 444
Development length—Design of lap-spliced bars: is simplification possible? (103-S47) Canbay, E., and Frosch, R. J., May-June 2006 444
Development length of glass fiber-reinforced polymer bars in concrete (103-S02) Wambeke, B. W., and Shield, C. K., Jan.-Feb. 2006 11
Dilger, W.—Unbalanced moment resistance by shear in slab-column

connections: experimental assessment (103-S09) Jan.-Feb. 2006 74
Displacement—Displacement history effects on drift capacity of reinforced concrete columns (103-S27) Pujol, S.; Sozen, M. A.; and Ramirez, J. A., Mar.-Apr. 2006 253
Displacement history effects on drift capacity of reinforced concrete columns (103-S27) Pujol, S.; Sozen, M. A.; and Ramirez, J. A., Mar.-Apr. 2006 253
Drift—Displacement history effects on drift capacity of reinforced concrete columns (103-S27) Pujol, S.; Sozen, M. A.; and Ramirez, J. A., Mar.-Apr. 2006 253
Du, J.
—Flexural behavior of two-span continuous prestressed concrete girders with highly eccentric external tendons (Disc. 102-S40) Mar.-Apr. 2006 308
—Stresses in external tendons at ultimate (Disc. 102-S20) Jan.-Feb. 2006 149
Ductility
—Axial load behavior of self-consolidating concrete-filled steel tube columns in construction and service stages (103-S05) Lachemi, M.; Hossain, K. M. A.; and Lambros, V. B., Jan.-Feb. 2006 38
—Stress-strain model for fiber-reinforced polymer jacketed concrete columns (103-S69) Harajli, M. H.; Hantouche, E.; and Soudki, K., Sept.-Oct. 2006 672
—Tests on precast concrete frames with connections constructed away from column faces (103-S03) Khoo, J.-H.; Li, B.; and Yip, W.-K., Jan.-Feb. 2006 18
Durability—Estimation of water retention curve from mercury intrusion porosimetry and van genuchten model (103-S31) Leech, C.; Lockington, D.; and Hooton, R. D., Mar.-Apr. 2006 291
